

ULTIMATE
ADVENTURE

FLY
FISHING

“ The crew went out of their way to tailor the adventure to our fly fishing experience ”

REMOTE BLUE WATER ACTION

where the fish grow big...

Our Fly Fishing Ultimate Adventure is tailored to the fly fishing enthusiast with a taste for exploring some of the most remote and pristine fly fishing locations in the world. These specialised charters allow a coverage of inshore creeks and rivers, mid reefs, islands and sand cays, with just a short run also to fish the blue holes of the stunning outer reef. This is a fly fisherman's nirvana and the opportunity to tick off more species than perhaps anywhere else on the planet.

The east coast fly fishing targets might literally include a hundred species such as Golden Trevally, Permit, Coral Trout and Giant Trevally - anything that can be caught on conventional tackle might be taken on fly, with the exception of deep-water species.

Over the week you will fish some of the most remote and productive waters in Australia aboard our 20' Centre Consoles in the hands of our specialised fly guiding team.

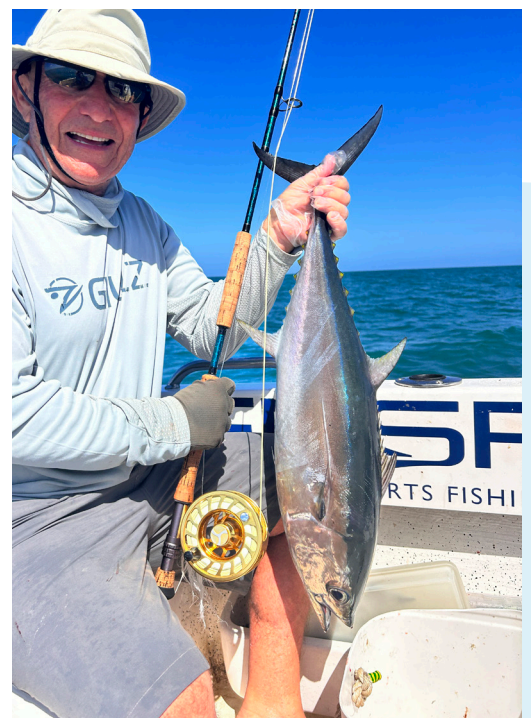

BIG BARRA TERRITORY

where the wild fishing is...

With a massive system of wetlands and rivers including the Ward, Watson, Small Archer and Archer Rivers, this is fly fishing paradise. FNSF-NOMAD flies direct via private plane charter from Cairns to the Aurukun airport where clients are quickly transferred to the mothership for a plan of attack, rig up and fly fishing that afternoon.

Fly guests can experience this huge array of different waterways, wetlands, beaches, and reef systems within close proximity to the mothership. A day trip to the north might place you alongside long, sandy beaches, towering bauxite cliffs and fish-filled reefs with clean inshore waters. A trip to the south and you are amidst the barramundi-rich waters of Love River.

Some of the fly fishing targets include Barramundi, Queenfish, Giant Trevally, Golden Trevally, Giant Herring, Blue Bastards, Milkfish, Permit, Mangrove Jack, Fingermark, Threadfin Salmon, Blue Salmon, and Saratoga.
